

5-19 Healthy Child Service

The 5-19 Healthy Child Service is a progressive universal programme which includes universal services appropriate for all children and young people, and additional services for those with specific needs and risk factors. The 5-19 Healthy Child Service works in community settings to deliver universal and targeted interventions designed to meet public health outcomes and ensure the emotional and physical health and wellbeing of families, children and young people across North Yorkshire are met.

The 5-19 Healthy Child Service is the first point of contact for schools when there are concerns about a child's health and wellbeing. Professionals can refer families to the service by completing the "[Referral to Children and Family Service](#)" form or by calling the Customer Resolution Centre single point of contact on 01609 780780. Parents, carers and young people themselves can access the service for support and information by calling the Customer Resolution Centre single point of contact on 01609 780780.

More information about the service can be accessed at the Harrogate and District NHS Foundation Trust [5-19 Children's Service page](#).
