GCSE Results 2022

This year's results are superb and are testament to the outstanding resilience of our students, given the challenges they have faced.

They have sustained the outstanding progress made by students at UWS in 2019 (and subsequently in the school-assessed grades of the following two years).

We are delighted that as a result of this success, all of our students have been able to move onto their destination of choice.

21% all grades awarded were at Grade 7 or higher, with 20 Grade 9s. Importantly, 77% students gained at least 5 standard passes (Grade 4 or higher) including English and Mathematics, with 63% achieving at least 5 strong passes at 5+ (again including English and Mathematics).

On average, a UWS student will achieve well over half a grade higher than their targets across a range of subjects; a just reward for all of their hard work over the five years.

GCSE Results 2022

As a non-selective state school in a selective area we welcome students of all abilities, interests, skills and aptitudes to our school.

We are unrelentingly ambitious for all of our students.

UWS students consistently exceed their own, very challenging targets.

They out-perform students nationally in many measures. We are extremely proud that our progress measures place us amongst the very best nationally.

We believe that by knowing our students as individuals, supporting and extending all students, having outstanding specialist staff and an inclusive, caring ethos we are able to truly deliver "excellence for all."
